

DISCOVER KAMPOT'S
SUSTAINABLE TOURISM

AMBER
KAMPOT

Tips: Discover Prek Tnaout, a 30-minute drive from Amber Kampot, and spot other fauna including dugongs, pelicans, sea turtles, and more.

PREK TNAOT

A CONSERVATION OF THE GRACIOUS PINK DOLPHIN

Surrounded by 275 hectares of natural mangroves and abundant fish and wildlife resources, Prek Tnaot serves as a local conservation area for the Irrawaddy River, commonly known as the Pink Dolphin. This endangered species has recently returned to the Prek Tnaot River, indicating a healthy habitat and unpolluted waters. Led by a team from Marine Conservation Cambodia (MCC), alongside Kampot provincial fishery officials and local community members, the area has recently become a model for responsible tourism in Kampot. The pink dolphins are an endangered species in Southeast Asia, found in Myanmar, Thailand, and Cambodia, with only a few thousand remaining. The MCC has implemented various methods to support the well-being and growth of the dolphins, including placing concrete boxes in the sea. These boxes provide a safe space for the dolphins to breed and help to reduce illegal or accidental captures, resulting in fifteen pink dolphins successfully returning to the river. This symbolic gesture underscores the resilience and determination of the local community in preserving the pink dolphins and their habitat.

OUR COMMITMENT TO MARINE CONSERVATION IN CAMBODIA

Amber Kampot proudly supports the Marine Conservation Cambodia (MCC) project, dedicated to preserving the majestic pink dolphin, an endangered species native to the Mekong River. By engaging in significant conservation initiatives that enhance Cambodia's natural environment and wildlife, Amber Kampot exemplifies responsible luxury tourism.

Our ongoing commitment includes three key initiatives:

Allocating 20% of revenue through booked room packages and redefining the recreational activities, all designed to promote marine conservation.

Donating 20 advanced fish nursery blocks in protected areas to effectively combat illegal fishing practices.

Enriching the local community through comprehensive training programs

Tip: Consider a day escape package to Prek Tnaot, where you may spot the endangered pink dolphins of the Mekong River.

RESTORED COMMUNITY HOUSE FACILITATED BY AMBER KAMPOT

PROVIDING A COMFORTABLE SPACE, ELEVATED DINING, AND UNIQUE EXPERIENCES.

KAMPOT PEPPER

A TREASURE FOR THE PALATE

With Cambodia's humidity, fertile soil, and tropical climate, Kampot is renowned for producing some of the finest quality pepper in the world, offering a pungent taste, bold spiciness, and a distinctive aroma. Kampot Pepper is often described as a unique spice, elevating authentic Cambodian cuisine to new heights. Numerous local plantations in this province cultivate Kampot Pepper to satisfy international demand. This production has become an essential source of income for Kampot province, particularly benefiting local farmers and promoting responsible tourism practices.

Tip: When travelling to Kampot, do not miss the opportunity to visit a local plantation and enjoy Khmer cuisine at Arvi, where fresh Kampot peppers are served for your lunch or dinner.

SALT, CRAB, & SUNSET

ASTONISHING EXPERIENCES OF KEP

Tip: Spend a day discovering Kampot and have dinner while savoring the freshness of Kep's Crab

Located 30 minutes to the southwest of Kampot, Kep is a local village renowned for its legendary crab cuisine. In collaboration with local fishermen and the government, Kep Market is hard to miss, with its reputation as one of the most significant landmarks in the area. Visitors are encouraged to try the delicacies while witnessing a stunning sunset from Kep. Prior to arriving in Kep, one should visit the Kampot Salt Fields, where salt is produced using inherited ancient techniques that impart an earthy sensation to its crystals. These efforts inspire other provinces to maximise their abundant resources, ensuring sustainability and benefiting the local community.

GIVING BACK TO THE COMMUNITY

ASTONISHING EXPERIENCES OF KEP

Amber Kampot has provided local training to a nearby school, emphasizing the importance of cleanliness and recycling. Solid waste management is a complex issue that involves socioeconomic, institutional, and environmental factors. Due to rapid urban growth, it has become one of the most significant challenges faced by so many areas in Cambodia. There is a noticeable gap in environmental knowledge among both the youth and the elderly in Cambodia, contributing to ecological issues and waste management problems, which leads to unsustainable development with serious consequences. In response, Amber Kampot advocates for communities by raising awareness, promoting best practices, and, most importantly, educating the younger generation.

*Support Amber Kampot initiatives by donating to our Giving Back to the Community.
